ON CLOUD 9

Delivered in May and presented for the first time during September's Monaco Yacht Show, the 74-metre CRN CLOUD 9 is the result of a rare collaboration between three big players in superyachts. The technical side of proceedings was looked after by the CRN engineering team in Ancona, on Italy's Adriatic coast; the yacht's exterior was designed by Zuccon International Project, based in Rome; while London's Winch Design was summoned to create the exterior guest areas and interior decoration. Accommodating up to 16 guests, 22 crew and a further four staff, floor space totals more than 1,000 sq metres. CLOUD 9 is powered by two Caterpillar 3516C-Chd 2000 kW@1600 rpm engines, delivering a maximum speed of 16.5 knots and a cruising speed of 12 knots. The yacht will be chartering in the Caribbean this winter, represented by Burgess as Worldwide Central Agents, with weekly rates from US\$875,000. (approx. £646,000), burgessyachts.com
