RESULTING FROM A CLOSE COLLABORATION BETWEEN CRN, Zuccon International Project, and Winch Design, the custom-built CRN CLOUD 9 is a powerful combination of engineering expertise and cutting-edge design. With its elegant aesthetics and literal boatload of features, this superyacht will enlighten its occupants as to the true meaning behind the phrase 'on cloud 9'.

A

lready lauded as one of the most impressive new superyachts to hit the water this year, CLOUD 9 is the culmination of the expertise of a team of perfectionists energised by the vision and enthusiasm of its owner.

With an overall length of 74 metres, a beam of 13.5 metres, and five expansive decks plus a sub deck, this is a superyacht of world-class calibre. Among its extensive amenities are a spa, swimming pool, a fully-equipped gym, and a beach club.

The design optimises balance between interior and exterior spaces, with impressive volume and a high degree of comfort, along with a free flowing layout for a

relaxed indoor-outdoor living environment.

Imaginative and carefully-chosen details can be found across all five decks, characterised by understated colour schemes and a varied use of oak in many different guises, juxtaposed with mother-of-pearl elements, marine-inspired artwork and unique bas-relief decorations, such as the bespoke piece in the owner's suite.

The yacht will be chartering in the Caribbean this winter, represented by Burgess as Worldwide Central Agents, with weekly rates from US\$875,000.
